

Request for Interpretation No. 23

of

AC Class Rule Version 1.4: December 8th 2015

Rule References:

Class Rule 7.2

Questions:

Class rule 7.2 requires all external hull moldings to be manufactured from approved moulds. The transom is a flat panel. What is required to approve the mould for the transom?

Interpretation:

As the transom is planar no approval of the mould is required. The panel may be built on any flat surface.

The Measurement Committee will check that the transom is planar and correctly aligned and installed in the yacht.

END

Issued by the America's Cup Measurement Committee on May 25, 2016
